

Best Shitcoin Ever

Whitepaper v1.0

„Even if the name doesn't suggest it, Best Shitcoin Ever is a serious project. Those who have understood the idea behind it are enthusiastic about it. BSE is the new token of a community that offers added value for online stores, networkers, Youtubers, bloggers, alternative media and many other online services that has never existed in this form before because of the hyperdeflationary token.“

Freiherr Dennis von KryptoRente

Best Shitcoin Ever

Whitepaper v1.0

Exploiting the possibilities of cryptocurrencies

Cryptocurrencies differ from fiat money in many ways. Decentralization, a fixed money supply, worldwide transactions within seconds and the possibility to create a deflationary currency are features that are not found in fiat money. We have designed a hyperdeflationary token, which is exactly the opposite of fiat money. Because we are convinced that deflationary money increases the demand for quality.

Background

Fiat money suffers from constant inflation, which causes it to lose purchasing power. Savers are treated unfairly in this way. With Best Shitcoin Ever, we have designed a token that rewards savers for holding the token in their wallet.

When someone exchanges BSE for another currency, a smart contract buys back all or part of the BSE and burns it, making the money supply smaller and smaller, which makes the token more valuable.

Since Best Shitcoin Ever will become more and more valuable, people are not willing to give it away for low-quality products. Buying behavior is healthier than with fiat money, which is constantly losing money. So, as a trader, with deflationary money, you are forced to offer good quality with added value.

Whitepaper v1.0

Problem solving

With Best Shitcoin Ever, you no longer need a third party where you can increase your coins. You keep your tokens in your wallet and they automatically grow, as a part of the transaction fees is shared among the holders.

The quality of the products and services offered for Best Shitcoin Ever will be of a high standard or provide an added value that is worth paying for with BSE. The BSE community will be very conscious consumers.

Mission

We have made it our mission to create a token that represents high value for the community due to its hyperdeflationary nature combined with the BSE BuyBack feature. A token that people would rather hold than spend on junk, which should also make it interesting for savers and retirement planning.

People who cannot afford BSE should also be able to benefit from the opportunities offered by Best Shitcoin Ever. We achieve this by designing an infrastructure behind the token that does not consist of investment opportunities.

Best Shitcoin Ever

Whitepaper v1.0

About BSE Token

Best Shitcoin Ever is a deflationary community token on the Binance Network that uses the new standard of DeFi tokenomics. Its features make Best Shitcoin Ever very interesting for both holders and traders.

An 11% fee is paid on each transaction. The fee is split for Holders Reward, BSE BuyBack and marketing fee. The token amount is limited to 888,000,000,000 BSE.

Holdings Reward

Four percent fee is applied to transactions for the Holdings Reward. The Holdings Reward is automatically divided among the wallets that hold Best Shitcoin Ever. Thus, you are no longer forced to give your coins away for investments; you simply keep your BSE in your own wallet and it automatically becomes more.

BSE BuyBack

BSE BuyBack is a revolutionary feature. For each transaction, 4% fee is charged for the BuyBack function. This fee is managed by a Smart Contract, which automatically ensures price stability.

Whenever BSE is sold on Pancakeswap, the Smart Contract buys back BSE worth up to 8 BNB. This prevents large dumps and ensures a permanent increase in the price in the long run, making the token interesting even for savers. Best Shitcoin Ever is even suitable to protect fiat money from inflation.

Best Shitcoin Ever

Whitepaper v1.0

Marketing Fee

Three percent is charged on each transaction for the marketing fee. The marketing fee is used to promote the infrastructure behind Best Shitcoin Ever. The permanent promotion of BSE-World.com ensures constant traffic from advertisers as well as from people interested in crypto. Deposits and withdrawals will be made exclusively in BSE which means that there will be a lot of transactions and therefore transaction fees.

Infrastructure

The most important thing about the token is the infrastructure. After all, what's the point of Best Shitcoin Ever getting transaction fees if there's no reason to send BSE? For this reason, we are already working on an infrastructure that will provide plenty of transactions.

GPT and PTC

The first services we offer on BSE-World.com are GPT (Get Paid To) and PTC (Paid To Click). With these offers, earners all over the world can earn Best Shitcoin Ever by completing tasks or watching advertisements.

Each completed task is rewarded with an unusually high reward. This generates a lot of traffic to the website, creating two advantages. The first advantage is that the website becomes more and more interesting for advertisers because of the high traffic. The second advantage is that you don't get Holder Rewards while the earned tokens are on BSE-World.com - so the

Best Shitcoin Ever

Whitepaper v1.0

community is encouraged to transfer the tokens to their wallet to benefit from Holder Rewards, which in turn generates fees for Holder Rewards, BSE BuyBack and marketing.

Marketplace

Second, we will integrate a marketplace into the platform. There, everyone will be able to offer their products and services directly to BSE. We do not expect much traffic from the marketplace. The marketplace should make it easier for the community to trade with each other. Nevertheless, every posted offer will get an affiliate link, so that it can be advertised and linked outside of BSE-World.com.

Affiliate network

In an affiliate network, advertisers can place ads that website owners can use on their websites, blogs, etc. For each click on the advertisement, the website owners then receive BSE as a reward. The advertisers only need to pay for the traffic that actually lands on their website.

In addition, we will post training courses online where earners can learn how to build their own profitable online business and earn extra money using the BSE-World.com affiliate network.
